SUBJECT INDEX

1030 Design methodology

Balakrishnan, Nagraj; *A Multiple-Choice Knapsack Model for Tolerance Allocation in Mechanical Assemblies*; July; p. 13.

Lee, Woo-Jong, Tony C. Woo, and Shuo-Yan Chou; *Tolerance Synthesis for Nonlinear Systems Based on Nonlinear Programming*; January; p. 51.

Kusiak, Andrew, and Edward Szczerbicki; *Transformation From Conceptual to Embodiment Design*; July; p. 6.

1100 Manufacturing machines

Rodriguez, Arturo A., and O. Robert Mitchell; *A Vision System for Manufacturing Applications Under Moderately Unconstrained Conditions*; July; p. 15.

1270 Process modeling

Burke, Laura I.; *An Unsupervised Neural Network Approach to Tool Wear Identification*; January; p. 16.

1320 Flexible manufacturing systems

Kim, Yeong-Dae, and Candace Arai Yano; *Heuristic Approaches for Loading Problems in Flexible Manufacturing Systems*; January; p. 26.

1330 Manufacturing systems analysis

Kuik, Roelof, Marc Salomon, Luk N. Van Wassenhove, and Johan Maes; *Linear Programming, Simulated Annealing and Tabu Search Heuristics for Lotsizing in Bottleneck Assembly Systems*; January; p. 62.

Xie, Xiaolan; *Performance Analysis of a Transfer Line with Unreliable Machines and Finite Buffers*; January; p. 99.

Yu, Kei-Yun Calvin, and Dennis L. Bricker; *Analysis of a Markov Chain Model of a Multistage Manufacturing System with Inspection, Rejection, and Rework*; January; p. 109.

1350 Manufacturing systems control

Davis, Wayne J., and S. Daniel Thompson; *Production Planning and Control Hierarchy Using a Generic Controller*; July; p. 26.

1360 Manufacturing systems design

Bard, Jonathan F., Anura deSilva, Thomas A. Feo, and Steven D. Wert; *Design of Semi-Automated Mail Processing Facilities*; July; p. 87.

Kusiak, Andrew, Warren J. Boe, and Chunhung Cheng; *Designing Cellular Manufacturing Systems: Branch-and-Bound and A* Approaches*; July, p. 46.

Urban, Timothy L.; *A Heuristic for the Dynamic Facility Layout Problem*; July; p. 57.

1370 Manufacturing systems modeling

Askin, Ronald G., M. George Mitwasi, and Jeffrey B. Goldberg; *Determining the Number of Kanbans in Multi-Item Just-in-Time Systems*; January; p. 89.

1410 Analysis methods

Tsai, Russell D., Eric M. Malstrom, and Way Kuo; *Three Dimensional Palletization of Mixed Box Sizes*; July; p. 64.

Rosenblatt, Meir J., Yaakov Roll, and Vered Zyser; *A Combined Optimization and Simulation Approach for Designing Automated Storage/Retrieval Systems*; January; p. 40.

1450 Material handling functions

Hall, Randolph W.; *Distance Approximations for Routing Manual Pickers in a Warehouse*; July; p. 76.

2000 Applied optimization

Buchanan, David J., and George O. Wesolowsky; *Locating a Noxious Facility with Respect to Several Polygonal Regions Using Asymmetric Distances*; January; p. 77.

2040 Integer programming

Bard, Jonathan F., Anura deSilva, Thomas A. Feo, and Steven D. Wert; *Design of Semi-Automated Mail Processing Facilities*; July; p. 87.

Tsai, Russell D., Eric M. Malstrom, and Way Kuo; *Three Dimensional Palletization of Mixed Box Sizes*; July; p. 64.

2050 Linear programming

Montreuil, Benoit, Uday Venkatadri, and H. Donald Ratliff; *Generating a Layout from a Design Skeleton*; January; p. 3.

2070 Nonlinear programming

Lee, Woo-Jong, Tony C. Woo, and Shuo-Yan Chou; *Tolerance Synthesis for Nonlinear Systems Based on Nonlinear Programming*; January; p. 51.

2150 Queueing systems

Yu, Kei-Yun Calvin, and Dennis L. Bricker; *Analysis of a Markov Chain Model of a Multistage Manufacturing System with Inspection, Rejection, and Rework*; January; p. 109.

2240 Pattern and voice recognition

Burke, Laura I.; *An Unsupervised Neural Network Approach to Tool Wear Identification*; January; p. 16.

2425 Optimization

Rosenblatt, Meir J., Yaakov Roll, and Vered Zyser; *A Combined Optimization and Simulation Approach for Designing Automated Storage/Retrieval Systems*; January; p. 40.

3220 Layout planning

Kusiak, Andrew, Warren J. Boe, and Chunhung Cheng; *Designing Cellular Manufacturing Systems: Branch-and-Bound and A* Approaches*; July, p. 46.

Montreuil, Benoit, Uday Venkatadri, and H. Donald Ratliff; *Generating a Layout from a Design Skeleton*; January; p. 3.

Urban, Timothy L.; *A Heuristic for the Dynamic Facility Layout Problem*; July; p. 57.

3225 Location decisions

Buchanan, David J., and George O. Wesolowsky; *Locating a Noxious Facility with Respect to Several Polygonal Regions Using Asymmetric Distances*; January; p. 77.

3235 Network analysis

Aronson, Jay E., and B. David Chen; *A Computational Study of Empirical Decision Horizons in Infinite Horizon, Multiperiod Network Flow Problems*; January; p. 73.

3430 Hierarchical production planning and control

Davis, Wayne J., and S. Daniel Thompson; *Production Planning and Control Hierarchy Using a Generic Controller*; July; p. 26.

3450 Transportation

Askin, Ronald G., M. George Mitwasi, and Jeffrey B. Goldberg; *Determining the Number of Kanbans in Multi-Item Just-in-Time Systems*; January; p. 89.

3470 Lot sizing

Kuik, Roelof, Marc Salomon, Luk N. Van Wassenhove, and Johan Maes; *Linear Programming, Simulated Annealing and Tabu Search Heuristics for Lotsizing in Bottleneck Assembly Systems*; January; p. 62.

3530 Production scheduling

Wemmerlöv, Urban, and Asoo J. Vakharia; *On the Impact of Family Scheduling Procedures*; July; p. 101.

3590 Work release and loading

Kim, Yeong-Dae, and Candace Arai Yano; *Heuristic Approaches for Loading Problems in Flexible Manufacturing Systems*; January; p. 26.

SUBJECT INDEX

2030

Martel, Alain; *A Heuristic Method for the Automatic Drawing of System Modeling Graphs*; November; p. 108.

2040

Kettani, Ossama, and Muhittin Oral; *Reformulating Quadratic Assignment Problems for Efficient Optimization*; November; p. 97.

2100

Sastri, T., and C. O. Malave; *Statistical Association Learning of the Markov Decision Process*; May; p. 86.

2140

Pape, Elinor S.; *The Cost of Randomization in Work Sampling: An Illustration*; November; p. 89.

2150

Patuwo, B. Eddy, Ralph. L. Disney, and Donald C. McNickle; *The Effect of Correlated Arrivals on Queues*; May; p. 105.

2160

Montgomery, Douglas C., and David J. Friedman; *Prediction Using Regression Models with Multicollinear Predictor Variables*; May; p. 73.

2170

Das, Tapas K., and Martin A. Wortman; *Asymmetric Patrolling Repairman Systems with General Repair Time and Walk Time Distributions: Cost Analysis of Service Schedule*; November; p. 19.

2200

Usher, John S., and Glenn M. Whitfield; *Technical Note: Evaluation of Used-System Life Cycle Costs Using Fuzzy Set Theory*; November; p. 84.

2210

Golany, B., F. Y. Phillips, and J. J. Rousseau; *Models for Improved Effectiveness Based on DEA Efficiency Results*; November; p. 2.

2300

Abou-Amara, Iyad, Gerald W. Evans, and John S. Usher; *A Multiobjective Approach to Reliability Demonstration Testing*; May; p. 52.

2315

Tang, Kwei, and Jing-Jer Lo; *Determination of the Optimal Process Mean When Inspection is Based on a Correlated Variable*; May; p. 66.

Villalobos, J. René, Joseph W. Foster, and Ralph L. Disney; *Flexible Inspection Systems for Serial Multi-Stage Production Systems*; May; p. 16.

2325

Costa, Antonio F. B.; *Joint Economic Design of $\overline{X}$ and R Control Charts for Processes Subject to Two Independent Assignable Causes*; November; p. 27.

Hwarng, H. Brian, and Norma Faris Hubele; *$\overline{X}$ Control Pattern Identification Through Efficient Off-Line Neural Network Training*; May; p. 27.

Runger, George C., and Douglas C. Montgomery; *Adaptive Sampling Enhancements for Shewhart Control Charts*; May; p. 41.

2335

Pignatiello, Joseph J., Jr.; *Strategies for Robust Multiresponse Quality Engineering*; May; p. 5.

2340

Nelson, Barry L.; *Estimating Acceptance-Sampling Plans for Dependent Production Processes*; November; p. 11.

2345

Wasserman, Gary S.; *Technical Note: On How to Prioritize Design Requirements During the QFD Planning Process*; May; p. 59.

2425

Greenwood, Allen G., Loren Paul Rees, and Ingrid W. M. Crouch; *Separating the Art and Science of Simulation Optimization: A Knowledge-Based Architecture Providing for Machine Learning*; November; p. 70.
